jwarre46@kent.edu

Skills

Proficient in c++.

Familiar with java, javascript, and lua.

Dedicated towards solving problems.

Projects

Individual Study / Game Programmer

August 2025 - 2026, Kent State University

This involved working with the animation and game design students as an experimental group which was testing to see if this would be possible for the computer science capstone. This experience mainly involved working in unreal with my classmates in order to make a game with some substance.

Software Engineering / Game Programmer and Asset Team

August 2025 - 2026, Kent State University

This involved working with numerous of my classmates during a chaotic process of delivering a working product at the end of every week. It was challenging but this experience helped me realize what I could accomplish with a large team of people.

Extraneous Game Development Classes / Game Programmer

August 2025 - Present, Kent State University

I've taken numerous other classes that have helped me reach my current position and have given me some confidence in my craft. To name a few Game Engine Concepts, CS3, and HIC.

Education

Kent State University / Computer Science, Game Programming

August 2023 - Present, Kent State University

I am currently an undergraduate working towards my degree in Computer Science with a concentration of game programming.
